

ATAR

RESPONSE ORCHESTRATION & AUTOMATION **REDEFINED**

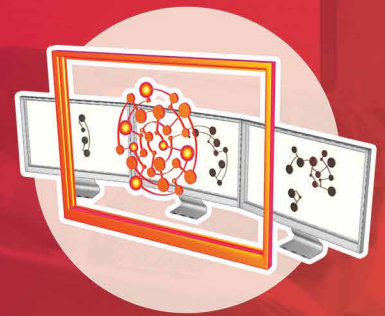

Automate Repetitive Investigation and Response Activities

Why not offload automate repetitive investigation and response activities to the **ATAR** robot and focus on the more out-of-ordinary?

Improve Analyst Efficiency

ATAR acts as a personal butler by fetching all data/evidence and taking actions on the analysts behalf with a single click.

Collect and Present SOC Metrics & KPIs

ATAR records all analyst activities and automated operations. Using data collected from SOC operations, **ATAR** provides KPIs and metrics.

Turbocharge Security Operations with ATAR

Atar Labs builds **ATAR**, industry's foremost security operations center management platform which covers automated response, analyst augmentation, collaborative investigations console and SOC KPI management.

2016 IT Architecture Awards
Best Datacenter Project of the Year

2016 TOBB StartupIstanbul
2nd Best Startup Company

BUSINESS VALUE

Respond Faster

Playbook automation, one-click evidence collection & one-click actions increase defense agility.

Handle Repetitive Activities

Focus on what is more significant and let ATAR handle the repetitive activities. Hit SLAs and increase operator satisfaction.

Drive Down Costs

Achieve more with less operators, decreasing losses and driving down costs.
